

eProphet Central integrates all modules of the eProphet system together, removing duplication of shared data and providing access to a range of store productivity tools.

Integration

eProphet Central allows multiple eProphet modules such as Cash Control, Inventory Control, Scheduling, and Labour to be utilised from one central application. Through eProphet Central data is shared amongst all eProphet applications, eliminating re-entry of any required input data.

Open & Close Checklists

eProphet Central allows you to create and maintain a store open and close routine that walks managers through important tasks to be performed at beginning and ending each day. eProphet can be also be configured to initiate POS system open and close procedures as well so you can automate more IT operations from your central backoffice PC.

Web Dashboard

The eProphet Central main menu houses a web enabled dashboard that can be configured to connect to supplemental Abcom services or even your own corporate Intranet and third party web services to allow franchise or chain-wide broadcasting to your stores.

Task Tracking

eProphet Central houses a powerful store task tracking system that ensures important store needs to do go unmissed. Tasks can recur on regular intervals as configured by you to simplify your store operations plans.

Management Messaging

No more Post-It notes falling behind the desk; allow your management team to leave important memos for the next manager or send messages directly to one another using eProphet Central. Messages can also be sent from the store level to the administration and back again.

Event Management

Capture, plan and track special store events and private functions and have that information become available to your managers at key operations stages such as scheduling, ordering and daily store opening to ensure your store events are a success.

Business Reporting

A comprehensive range of detailed reports are available that capture key totals and indicators; affording you important insight into your metrics by any date, period or year. Track and report on store activity and special events against projected sales, scheduled labour and inventory requirements.

Intuitive User Workflow

Core eProphet functions are always mapped into user guided workflows that help the user perform tasks correctly and completely. Our simple interfaces allow you to reduce ramp up time of store managers on system operations.

Flexible Currency and Language

eProphet Central can be configured to handle any currency and language to meet the needs of the store operation in any country.

Robust Technology

All eProphet systems are built using the highly acclaimed Microsoft® .NET® framework. The Microsoft® development platform is mature, robust and offers a massive range of advanced components and cutting edge functionality. In addition, adherence to strict Windows® development guidelines ensures that Abcom products offer long, productive life spans; representing a low risk, long term, quality software investment for your business.

Security & Confidentiality

Abcom systems are built with strong security for your peace of mind. All interaction with the system is restricted and logged by user account, configured however you so require. Additionally, all databases, data backups and data transmissions are 128bit encrypted to prevent unauthorised access from the outside.

eProphet Central – the core of eProphet; the truly world class Quick Service Restaurant system.
