

Payroll

Part of the eProphet Admin Back Office System
Easily manage and process payrolls for your QSR stores

Overview

The eProphet Payroll system is designed to be the perfect system for franchise QSR operators - particularly those who have previously used systems such as McProfits, Vandoes or Cosmos.

The system accepts comprehensive electronic input of employee clockings, rostered times and employee masterfile update data from a store eProphet/eBOS system. This data, along with a minimum of sundry input by the payroll administrator, is used to produce fast and accurate employee payments. Important records for the employer, employees, the ATO and other relevant parties such as superannuation funds are automatically updated by the system.

Features

- > The system will pick up weekly data from either eProphet or eBOS store backoffice systems via the internet or removable storage devices.
- > Hours worked, allowances and penalties payable for each shift are visually displayed in the new line bar grid in clocking review.
- > A comprehensive set of payroll run and anytime reports allow you to analyse your payroll operation and quickly view the information you need to maximise the profitability of your business.
- > An extremely powerful labour calculation engine that automatically applies even the most complex award conditions to prepare accurate payslips and internal records.
- > A detailed employee masterfile that is integrated with your store's backoffice system.
- > Facilities to selectively email payslips to your employees to reduce administration time and costs.
- > Automatic importing of the store's weekly roster for comparison. *
- > Easily transfer employee's history records from one payroll to another.
- > Accurate super reporting and end of year processes such as payment summary preparation.
- > All data is stored in a secured database, accessible only through a secured user account driven environment.
- > Network capability for administrations with multiple PC's.
- > Payment history can be tabulated for more than two years for current or terminated employees.
- > Automatic importing of employee meetings recorded at the store. *
- > Central file maintenance of all employee awards, SDA's and tax rates to ensure your employees are being paid according to the latest rules.
- > Intelligent system updating that downloads the latest software enhancements in the background while you work.
- > Flexible system backup options to suit your administration PC setup.
- > Built in PDF archiving of reports to allow reprinting for previous periods.

* Available now for eProphet users and soon for eBOS users

Benefits

MORE ACCURATE PAYROLL COSTS. eProphet Payroll is a quantum leap in correctly handling the complexities of modern labour awards and regulations to produce the most accurate payroll calculations possible, giving you the confidence your staff are being paid precisely as stipulated by the current agreement or award they are employed under.

COMPLETE DATA CONVERSION. All the data from your McProfits system will be automatically transferred across for you. This includes all employee masterfile data, historical payment figures, leave accrual records, payment summary data etc. It's a cinch to upgrade at any time, so you don't have to wait until the start of a financial year.

SIMPLE DATA TRANSFER. Data can be sent to and from your stores via internet connectivity. This eliminates the need for the admin to gain access to the store PC to download data, or wait for emails or disks to begin processing payroll.

IMPROVED STORE OPERATION. Roster data is automatically imported and displayed in the clocking review to allow you to spot deviations from the roster to further manage controllable labour costs. *

REVIEW CLOCKINGS FASTER. The new visual interpretation of clockings into colour coded linebars allows you to quickly and easily scan through the clockings for penalty payment warnings and other conditions that cost you substantial money over the year.

IMPROVED CLOCKING HANDLING. 24 hour store clockings and clockings that cross the start or end of the pay week are correctly processed and visually displayed in the new nine day clocking review.

IMPROVED LEAVE HISTORY. eProphet Payroll has improved facilities to ensure accurate tracking of sick leave, annual leave, long service leave and TOIL (Time Off in Lieu).

TWO WAY EMPLOYEE MASTERFILE. Changes made at the administration to your employee masterfile are pushed to the store and for eBOS stores, changes made at the store are imported for review and inclusion into your payroll masterfile at the admin. No more duplicated maintenance of two masterfiles for eBOS users.

DATA ENTRY ASSIST AND HELP. Any data entry errors are clearly highlighted and all screens come with help at the touch of a button.

CUSTOM AWARDS. Custom employee awards can be setup and configured to manage unique employee needs.

MANUAL PAYMENT ASSISTANCE. The built in custom payment calculator implements full award interpretation to assist you in calculating manual payment totals for conditions such as back pay.

Designed for eProphet / eBOS users.

eProphet Payroll requires Windows XP and broadband internet.
